EDUCATION

IIITR, Indian Institute of Information Technology, Raichur, Karnataka   **2023-2027**
B.Tech - Computer Science and Engineering - **CGPA** − **7.8**
Major courses: Discreate Structures, Data Analysis Algorithm, Digital and Logic Design, Digital System Design, Probability and Statistics,
Intro to AIDS, Operating Systems, Discreate Mathematics   -

EXPERIENCE

SDE Intern at FeelGood / Flutter, Dart   **Dec 2024 - Present**
- Developed and refined multiple Flutter screens to enhance UI/UX.
- Fixed existing UI issues and optimized performance.
- Quickly learned and applied HTTP requests, Flutter, and Dart within 1-2 weeks.

Co-Ordinator of DevX (Development Society of IIIT Raichur)   **Sept 2024 - Present**
- Mentored 400+ students. Collaborated with coding platform to conduct various events. Interacted with other colleges. Highly active in the development community. Organized sessions, events, quizzes, and contests for student of IIIT Raichur.
- Lead a team of 5 members. Distributed prizes for student's active participation.

PROJECTS

Spice and Slice: Food Recipe Website ⬀ / HTML, CSS, JavaScript   **March 2024**
Developed a complete frontend using web technologies.
- Successfully executed the project independently, demonstrating self-reliance and the ability to accomplish tasks autonomously.

Institute QR-Code attendance Application ⬀ / Flutter, Dart   **Sept 2024**
- Designed a flutter application which will mark student attendance using a dynamic QR-code (Python).
- Using flutter, python and backend with Nodejs and MongoDB.
- Collaborated in a 6-member team. Demonstrated effective teamwork and communication skills.

WeatherWise: Weather Forecasting app ⬀ / Flutter, Dart, HTTP requests   **May 2024**
- An app which can display the weather details dynamically by fetching data from public API's.
- Using flutter, Dart, HTTP requests and API generating function.

ApplyWise: Internship application app ⬀ / Flutter, HTTP requests, BeautifulSoup   **Sept 2024**
- Created an app that enables users to discover and apply for internships at MNCs.
- Utilized BeautifulSoup for web scraping to gather data from MNCs' career portals.
- Designed the backend to store and manage user preferences effectively.

IRCTC Automatic Ticket Booking: Web Automation Python Script with GUI   **May 2024**
- Developed a Python script to automate train bookings on IRCTC using Selenium.
- Designed a user-friendly booking interface with PYQT.
- Created this project solely for educational purposes, not for commercial use or distribution.

TECHNICAL SKILLS

- **Languages:** C++, C, **JavaScript** (Frontend), **Python** (Automation), Object Oriented Programming (OOP), Dart (App UI)
- **Technologies:** Flutter, NodeJS, MongoDB, ExpressJS, GitHub, Selenium, Web Automation, PyQT, HTML, CSS, Web Scrapping
- **Skills:** Flutter Developer, Backend Development, Frontend Development, Android App Development, Web Development

EXTRACURRICULAR

- Participated in SVYM Youth Day, engaging with startup CXOs and gaining valuable insights, have represented college.
- Attended an AI workshop led by Mr. Trivikra, organized by our college, learning about the future prospects and advancements in Artificial Intelligence.
- Solved 300+ coding problems (DSA and STL) on LeetCode and actively participated in coding contests.
- Contributed to social and environmental well-being as an active member of SVYM, addressing and resolving local issues in villages near our college.
- Participated in Smart India Hackathon (SIH) - 2024

LANGUAGE SPEAK

- **English, Hindi, Gujarati (Mother Tongue)**
